

Public Submissions - Objections					
No.	Date Submission Received	Name	Property Affected	Summary of Submission	Officer's Comment
43	19 Jan 18	Peter & Jenny Lambert	Morris Edwards Dr, York	<ul style="list-style-type: none"> • Objection to proposal. • Potential leaching of contaminants into air and ground water and impact on adjoining properties reliant on this in absence of scheme water. • Concerns of location of landfill within seismic zone, and impact on liners with risk of rupture or failure causing contamination. • Decrease in land value. • Impact on amenity. • Traffic Impacts of additional heavy vehicles and increased traffic on Great Southern Highway and concern of the adequacy and capacity of Great Southern Highway to accommodate. • Detrimental impact on economy from perceived opinion of York as area for a landfill, and additional heavy vehicles and traffic on Great Southern Highway deterring tourists from travelling to York. • Landfill is inconsistent with strategic waste planning principles and appears to be a “knee-jerk” reaction to a pressing problem which realistically requires the development of a state-wide waste development strategy. 	<p>Relevant environmental and environmental health issues (including contingencies) are discussed and responded to in the ‘Planning Assessment’ section within the RAR. Officers have noted that there is insufficient information to determine that the proposal will not have an adverse impact on natural resources or the environment.</p> <p>Impact on land value is not a listed matter to be considered by local government by the Scheme or Regulations.</p> <p>Comments regarding overall consistency with the Scheme (including impacts on amenity, economy and tourism), Strategic documents considered by SAT (including Waste Strategy and associated documents), State Planning Policies and Regional Plans are noted. The Shire notes that there is a lack of strategic planning to justify the landfill location and need for a landfill. However, there has not been a substantial change in the policy and strategy framework (note comments in RAR on areas where there may be amendments to consider) since determination of the application and it is not within the jurisdiction of this application to reconsider matters which have already been determined by the SAT.</p> <p>Traffic Impacts are discussed and responded to in the ‘Planning Assessment’ section within the RAR.</p>
44	19 Jan 18	Penelope Mossop & Kim Hack	Lot 5200 Great Southern Hwy, St Ronans	<ul style="list-style-type: none"> • Objection to proposal. • The period for substantial commencement has expired and the application has lapsed. • No more landfills required for 30 years, and investigation being completed by WA Waste Strategy. Decisions on landfills should await this decision. • Landfill site in proximity to national park is inappropriate • Site is inappropriate due to uncertainty and risk on environmental impacts; • Impact on adjoining landowners from pollution, contamination of rainwater, noise, odour and bushfire risk. • Insufficient assessment of hydrology on site and risk to Mundaring water catchment area. 	<p>Discussion on the application for extension is discussed in the Planning Assessment section within the RAR.</p> <p>Comments regarding overall consistency with the Scheme (including impacts on amenity and tourism), Strategic documents considered by SAT (including Waste Strategy and associated documents), State Planning Policies and Regional Plans are noted. The Shire notes that there is a lack of strategic planning to justify the landfill location and need for a landfill. However, there has not been a substantial change in the policy and strategy framework (note comments in RAR on areas where there may be amendments to consider) since determination of the application and it is not within the jurisdiction of this application to reconsider matters which have already been determined by the SAT.</p> <p>Relevant environmental and environmental health issues (including contingencies) are discussed and responded to in the ‘Planning</p>

				<ul style="list-style-type: none"> Traffic Impacts of additional heavy vehicles and increased traffic on Great Southern Highway and concern of the adequacy and capacity of Great Southern Highway to accommodate. 	<p>Assessment' section within the RAR. Officers have noted that there is insufficient information to determine that the proposal will not have an adverse impact on natural resources or the environment.</p> <p>Traffic Impacts are discussed and responded to in the 'Planning Assessment' section within the RAR.</p>
45	19 Jan 18	Jenine & Ian McColl	2974 Great Southern Hwy, St Ronans	<ul style="list-style-type: none"> Objection to proposal. Period for development to substantially commence has expired, and the application has lapsed. You cannot extend an application that has lapsed. Large amount of community opposition to proposal. No public consultation on proposal undertaken by applicant. Query as to reliability of applicant's statements regarding number of employees that will be required. Concern regarding landfill application applying to all four lots, when the landfill site is located on Lot 4869 only. Concern this will allow for expansion of operations. Detrimental impact on land values in proximity to site. Detrimental impact on surface and ground water from contamination and leaching. Insufficient information and monitoring bores to understand hydrology of site. Impact on property and dwelling from noise, odour and dust. Concern regarding impact on human health from dust and emissions, reliance on rainwater and contamination. Concern regarding reliability of landfill liners, and leachate pond to prevent leaching or spreading of contaminants. Construction of dam, impact on water availability to properties downstream and impact on 13 mile brook. Traffic Impacts of additional heavy vehicles and increased traffic on Great Southern Highway and concern of the adequacy and capacity of Great Southern Highway to accommodate. Location of landfill in proximity to bushland of high quality and on a site uphill of water tributary is inappropriate. Comment regarding previous application for subdivision on landowners adjoining property being refused due to bushfire concerns and impact on natural flora and fauna. Copies of news articles relating to issues of other waste management facilities. 	<p>Discussion on the application for extension is discussed in the Planning Assessment section within the RAR.</p> <p>Community opposition is noted as a reason that the extension of period to substantially commence the development should not be supported.</p> <p>Public consultation undertaken by the applicant is not a planning consideration for this application.</p> <p>The existing development approval and Special Use Zone No.8 as part of Scheme Amendment No. 50 both apply to Lots 4869, 5931, 9926 & 26934, recognising that the landfill requires a buffer affecting these lots. Any increase in size or modification of the approved development would require a new or future development application to the Shire of York, and potentially DWER. Assessment of that proposal would occur at that time.</p> <p>Impact on land value is not a listed matter to be considered by local government by the Scheme or Regulations.</p> <p>Relevant environmental and environmental health issues (including contingencies) are discussed and responded to in the 'Planning Assessment' section within the RAR. Officers have noted that there is insufficient information to determine that the proposal will not have an adverse impact on natural resources or the environment.</p> <p>Traffic Impacts are discussed and responded to in the 'Planning Assessment' section within the RAR.</p> <p>Comments regarding overall consistency with the Scheme (including impacts on amenity and tourism), Strategic documents considered by SAT (including Waste Strategy and associated documents), State Planning Policies and Regional Plans are noted. The Shire notes that there is a lack of strategic planning to justify the landfill location and need for a landfill. However, there has not been a substantial change in the policy and strategy framework (note comments in RAR on areas where there may be amendments to consider) since determination of the application and it is</p>

				<ul style="list-style-type: none"> • There are better alternative sites for a landfill, such as vacant mines. • No demonstrated need for landfill and reference to Minister Jacob letter dated 21 August 2013 stating that there is no need for more landfills until at least 2030. • Environmental and environmental health impacts from dust, odour, noise and lighting. • Concerns of location of landfill within seismic zone, and impact on liners with risk of rupture or failure causing contamination. • Clearing of large established trees within landfill site and impact on fauna. Concerns regarding impact of clearing and salinity. • Impact on bees and apiary businesses from dust emissions and use of chemicals. • Detrimental impact on flora and fauna. • Concerns regarding impact and methods of management (i.e insufficient fence) of feral animals and pests attracted to the site and spread of contaminants and toxins. • Impact on bio-security on adjoining farms, from spread of physical rubbish and query as to who will clean this up if it occurs. • Bushfire risk, and capacity of emergency services to respond. Query as to whether regulations on fire ban/movement bans apply to landfill operations. • Objectives of the State Government to reduce waste not being met, and landfill levees not being used for purposes to encourage waste being directed from landfills. • A bond should be required against rehabilitation of the site or remediation. Suggestion that 10 to 20 million would be appropriate. • Photos attached in support of submission. 	<p>not within the jurisdiction of this application to reconsider matters which have already been determined by the SAT.</p> <p>A previous subdivision which was not supported does not have implications in assessment of this application.</p> <p>Fire Management and associated considerations are discussed and responded to within the 'Planning Assessment' section in the Planning Assessment within the RAR.</p>
46	19 Jan 18	Larry Kane	PO Box 417, York	<ul style="list-style-type: none"> • Objection to proposal. • Application has not been substantially commenced and has lapsed. An extension should not be permitted, a new application is required. 	<p>Discussion on the application for extension is discussed in the Planning Assessment section within the RAR.</p>
47	19 Jan 18	Jane Ferro	40 Hoops Rd, Cold Harbour	<ul style="list-style-type: none"> • Objection to proposal. • Period for development to substantially commence has expired, and the application has lapsed. You cannot extend an application that has lapsed. 	<p>Discussion on the application for extension is discussed in the Planning Assessment section within the RAR.</p> <p>Comments regarding overall consistency with the Scheme (including impacts on amenity and tourism), Strategic documents considered by SAT</p>

			<ul style="list-style-type: none"> • No demonstrated need for landfill and reference to Minister Jacob letter dated 21 August 2013 stating that there is no need for more landfills until at least 2030. • WALGA has identified that there are Draft Environmental standards being formulated with a requirement that landfill needs must be demonstrated prior to construction being approved. • Traffic Impacts of additional heavy vehicles and increased traffic on Great Southern Highway and concern of the adequacy and capacity of Great Southern Highway to accommodate. • Government planning documents indicate waste disposal should be transported along strategic planning corridors; i.e Great Eastern Hwy, Great Northern Hwy, Brand Hwy. • A bond should be required against rehabilitation of the site or remediation. Suggestion that 5 million would be appropriate. • Insufficient bores and water monitoring to demonstrate hydrology underlying the site. • Objectives of the State Government to reduce waste not being met, and landfill levees not being used for purposes to encourage waste being directed from landfills. • Detrimental impact on environment from landfills from leaching of contaminants impacting land and surrounding waterways and query as to how waterways will be protected. • Rail is a better method of transporting waste. • Concern regarding type of waste to be contained within landfill, which will contain toxic and dangerous materials. • Query as to why a landfill not environmentally suitable to be located on the Swan Coastal plain is acceptable in the Avon Valley. • Deficiency in application regarding how the site will be managed after the landfill is closed, but waste in buried cells is active and concern regarding funding and capacity to manage in this phase. • Detrimental impact on amenity. • Query regarding indemnification of community in the case of pollution of groundwater, drinking water, livestock or pasture. 	<p>(including Waste Strategy and associated documents), State Planning Policies and Regional Plans are noted. The Shire notes that there is a lack of strategic planning to justify the landfill location and need for a landfill. However, there has not been a substantial change in the policy and strategy framework (note comments in RAR on areas where there may be amendments to consider) since determination of the application and it is not within the jurisdiction of this application to reconsider matters which have already been determined by the SAT.</p> <p>WALGA has issued a policy statement on waste management that legislative amendments should be made to ensure that consideration of landfill applications by DWER align can be refused if the facility will undermine the State Waste Strategy (i.e that there be a demonstrated need for landfill). This has not been adopted into any documents.</p> <p>Traffic Impacts are discussed and responded to in the 'Planning Assessment' section within the RAR.</p> <p>The Shire notes comments regarding the previous assessment. It is not the Shire's role to consider the adequacy of previous determinations made by the SAT or DWER.</p> <p>Comments regarding landfill levees and wider operation of waste management is noted, although not something that can be addressed within assessment of this proposal.</p>
--	--	--	---	--

				<ul style="list-style-type: none"> Concerns of location of landfill within seismic zone, and other landfills have been built in more stable areas which have had leaks in liners. Precautionary principle should be applied due to risk of proposal. Inequitable to future generations. Impact on human health from emissions. 	
48	19 Jan 18	Lynley Bashford	3452 Great Southern Hwy, St Ronans	<ul style="list-style-type: none"> Objection to proposal. The development was not substantially commenced in accordance with condition 9 of the development approval and has lapsed. A new application is required. 	Discussion on the application for extension is discussed in the Planning Assessment section within the RAR.
49		Christopher Meadmore	3452 Great Southern Hwy, St Ronans	<ul style="list-style-type: none"> The information provided to the public for this application is mainly based on the previous application by SITA/SUEZ. On the 19th July 2017 a Technical Memo, only after a desktop assessment, was sent to Mr Salvatore Mangione = Alkina Holdings Pty Ltd from the DER (now the DWER) with a works approval application favouring the landfill. This is wrong as after reading the documents this whole idea of a landfill and the information used is very misleading. This information can be found at www.der.wa.gov.au/Attachement_8n_A1501478_Works-approval-applications. Proforma comments referred addressed further below. 	<p>There is nothing within the planning framework that prohibits the use of information prepared by another application (subject to copyright issues not arising).</p> <p>The Shire notes comments regarding the previous assessment. It is not the Shire's role to consider the adequacy of previous determinations made by the SAT or DWER.</p>
50	19 Jan 18	Gino Caruso BA	30 Panmure Rd, York	<ul style="list-style-type: none"> Objection to Proposal. Development has had a two-year window to commence development. An approval which has expired should not be able to be extended. No demonstrated need for landfill and reference to Minister Jacob letter dated 21 August 2013 stating that there is no need for more landfills until at least 2030. Long term Government plans show the Gt Eastern Hwy to be rerouted along the Toodyay Road. Government planning documents dealing with waste disposal indicate that rubbish should be transported along major transport corridors e.g. Great Eastern Highway. No rubbish trucks should be allowed onto the Great Southern Highway. WALGA has identified that there are Draft Environmental standards being formulated with a requirement that landfill needs must be demonstrated prior to construction being approved. 	<p>Discussion on the application for extension is discussed in the Planning Assessment section within the RAR.</p> <p>Comments regarding overall consistency with the Scheme (including impacts on amenity and tourism), strategic documents considered by SAT (including Waste Strategy, landfills being located on strategic freight routes and associated documents), State Planning Policies and Regional Plans are noted. The Shire notes that there is a lack of strategic planning to justify the landfill location and need for a landfill. However, there has not been a substantial change in the policy and strategy framework (note comments in RAR on areas where there may be amendments to consider) since determination of the application and it is not within the jurisdiction of this application to reconsider matters which have already been determined by the SAT.</p> <p>WALGA has issued a policy statement on waste management that legislative amendments should be made to ensure that consideration of landfill applications by DWER align can be refused if the facility will</p>

				<ul style="list-style-type: none"> • Safety concerns of additional heavy vehicles on Great Southern Highway, and comment on rubbish trucks being involved in crashes since previous RAR report. • A 5 million rehabilitation Bond should be required. In the event that something occurs and rehabilitation of the site not carried out, rehabilitation will cost millions and may be difficult to require its implementation. A project of this scale and risk is not unreasonable to require a bond to be paid upfront. • Insufficient monitoring of bores carried out, to provide understanding of hydrology of area. Should the development be approved, additional conditions should be imposed to investigate hydrology of area. • Landfill Levees collected by the WA Government original purpose was to create a disincentive to taking stuff to landfill and to create a fund to finance options. Levees collected have been directed to General Revenue, not fulfilling this purpose and need to be directed to finding solutions to waste disposal issues. Landfill proposals such as this one are a result of absence of coherent policy on waste. • There is no demonstrated benefit to the Shire of York and community. • Inconsistent with Shire of York Town Planning Scheme, Strategy and Planning Policy, which is inconsistent with orderly and proper planning. • Alternative more sustainable technologies available other than diverting waste to landfill. 	<p>undermine the State Waste Strategy (i.e that there be a demonstrated need for landfill). This has not been adopted into any documents.</p> <p>Traffic Impacts are discussed and responded to in the 'Planning Assessment' section within the RAR.</p> <p>'Risk' and 'contingency is fall within the scope of environmental issues. Relevant environmental and environmental health issues are discussed and responded to in the 'Planning Assessment' section within the RAR. Officers have noted that there is insufficient information to determine that the proposal will not have an adverse impact on natural resources or the environment or that the proposal has been progressed enough by DWER to confirm that the existing conditions are sufficient (including conditions regarding contingency planning).</p> <p>Comments regarding landfill levees and wider operation of waste management is noted, although not something that can be addressed within assessment of this proposal.</p> <p>Value or benefits to community is discussed and responded to in the 'Planning Assessment' section within the RAR.</p>
51	19 Jan 18	Desmond Bradley	733 Ovens Rd, York	<ul style="list-style-type: none"> • Objection to proposal. • Traffic Impacts of additional heavy vehicles and increased traffic on Great Southern Highway and concern of the adequacy and capacity of Great Southern Highway to accommodate. • Detrimental impact on economy from perceived opinion of York as area for a landfill, and additional heavy vehicles and traffic on Great Southern Highway deterring tourists from travelling to York. • Leaching from landfill causing contamination of groundwater, impacting adjoining water catchment. • Bushfire risk. • Capacity of local emergency services to response to increase in road accidents. 	<p>Traffic Impacts are discussed and responded to in the 'Planning Assessment' section within the RAR.</p> <p>Relevant environmental and environmental health issues (including contingencies) are discussed and responded to in the 'Planning Assessment' section within the RAR. Officers have noted that there is insufficient information to determine that the proposal will not have an adverse impact on natural resources or the environment.</p> <p>Fire Management and associated considerations are discussed and responded to within the 'Planning Assessment' section in the Planning Assessment within the RAR.</p>

52	19 Jan 18	M & P Wilson	460 Walker St, Mundaring	<ul style="list-style-type: none"> • Objection to proposal. • Concern regarding intent of new applicant. • No strategic plan for landfill site locations for the region. • Increase in traffic volume from that stated is likely. Concern on impact to Mundaring residents from through traffic to site from smell, content of toxic materials and additional congestion. Note that there are long term plans for relocation of Gt Eastern Highway to Toodyay Road. • Waste disposal should be transported along major transport corridors and not Great Southern Highway due to high amount of crashes. • Risk of site in proximity to areas of high value and water catchment areas where contamination of groundwater could occur is unacceptable. • Leachate ponds in low lying area which may be subject to flooding or inundation increasing risk of contamination and use is higher than catchment where contaminated runoff will gravitate towards Helena River. • Concerns of location of landfill within seismic zone, and impact on liners with risk of rupture or failure causing contamination. • Bushfire risk and impact on liner. • There is a known hydrological connection between the proposed landfill site and the catchments. Any efforts to deny this need to be supported by evidence. Additional monitoring bores should be required. • Air pollution from dust. • No demonstrated benefits to the community, or cost-benefit analysis undertaken. • Query regarding whether all conditions of 2015 SAT decision will apply. • Shire needs further input into conditions it would need to enforce. • A rehabilitation bond is required to ensure that any contamination has funds to be remediated. Suggestion of \$5 million dollar bond to be lodged with the Shire of York. • Support for the 2014 decision by the JDAP. • Application has lapsed, and an extension is not valid. 	<p>The change in applicant and associated implications is discussed in the 'Planning Assessment' section of the RAR.</p> <p>Comments regarding overall consistency with the Scheme (including impacts on amenity and tourism), Strategic documents considered by SAT (including Waste Strategy and associated documents), State Planning Policies and Regional Plans are noted. The Shire notes that there is a lack of strategic planning to justify the landfill location and need for a landfill. However, there has not been a substantial change in the policy and strategy framework (note comments in RAR on areas where there may be amendments to consider) since determination of the application and it is not within the jurisdiction of this application to reconsider matters which have already been determined by the SAT.</p> <p>Relevant environmental and environmental health issues (including contingencies) are discussed and responded to in the 'Planning Assessment' section within the RAR. Officers have noted that there is insufficient information to determine that the proposal will not have an adverse impact on natural resources or the environment.</p> <p>Traffic Impacts are discussed and responded to in the 'Planning Assessment' section within the RAR.</p> <p>Fire Management and associated considerations are discussed and responded to within the 'Planning Assessment' section in the Planning Assessment within the RAR.</p> <p>Value or benefits to community is discussed and responded to in the 'Planning Assessment' section within the RAR.</p> <p>The form 2 application proposes to amend condition 9 of the approval relating to the period for substantial commencement only. All other conditions will remain.</p>
----	-----------	--------------	-----------------------------	--	---

				<ul style="list-style-type: none"> No demonstrated need for a landfill. Draft Environmental Standards are being formulated which emphasises that there must be a demonstrated need for a landfill site prior to any approval of new construction. Landfill is inconsistent with strategic directions for waste avoidance, re-use, recycling and minimisation. 	
53	19 Jan 18	Harley Davies	19 Prendiville Way, Langford	<ul style="list-style-type: none"> Objection to proposal. The purpose of 'substantial commencement' is to require a development to be commenced within a prescribed time because 'it is undesirable that a developer should have available for an indefinite time an approval in respect of a development which changing patterns of use or changing community attitudes might, over time render inappropriate. It is in the interests of orderly planning that an approval for building or for use, once obtained, should be acted upon or should expire, within a reasonable time.' 	Discussion on the application for extension is discussed in the Planning Assessment section within the RAR.
54	19 Jan 18	Eric Davies	19 Prendiville Way, Langford	<ul style="list-style-type: none"> Alkina Holdings Pty Ltd have submitted a 'fresh' Works Approval Application, thus suggesting that the planning framework may have potentially changed substantially since the original development approval was granted. It is my understanding that the Department of Water and Environmental Regulation are currently assessing the extent to which the Alkina Holdings Pty Ltd proposal has changed. Any deviations from the original planning framework should be considered a substantial change in the context of the risks that the landfill poses to the environment, the agricultural industry and the community of York. Alkina Holdings Pty Ltd will be leasing Allawuna from AMI Enterprises Pty Ltd for a period of approximately 20 years. Alkina Holdings Pty Ltd is a small company with few shareholders and I question their financial position to implement the required multimillion dollar contingency plan when contamination occurs to the environment or businesses in the area. If sufficient contingency planning is not able to be accounted for or implemented, this may be considered to be a substantial change to the planning framework since the original development approval was granted; 	<p>Community opposition is noted as a reason that the extension of period to substantially commence the development should not be supported.</p> <p>There has been no substantial change in the planning framework, apart from the advancement of Scheme Amendment No. 50, which is discussed in the RAR report. Deviations from the current planning approval, and amendments from the current works approval application to the planning approval is discussed in the RAR and in comments in response to submission 16.</p> <p>'Risk' and 'contingency is fall within the scope of environmental issues. Relevant environmental and environmental health issues are discussed and responded to in the 'Planning Assessment' section within the RAR. Officers have noted that there is insufficient information to determine that the proposal will not have an adverse impact on natural resources or the environment or that the proposal has been progressed enough by DWER to confirm that the existing conditions are sufficient (including conditions regarding contingency planning).</p> <p>Comments regarding overall consistency with the Scheme (including impacts on amenity and tourism), Strategic documents considered by SAT (including Waste Strategy and associated documents), State Planning Policies and Regional Plans are noted. The Shire notes that there is a lack of strategic planning to justify the landfill location and need for a landfill. However, there has not been a substantial change in the policy and strategy framework (note comments in RAR on areas where there may be amendments to consider) since determination of the application and it is not within the jurisdiction of this application to reconsider matters which have already been determined by the SAT.</p>

				<ul style="list-style-type: none"> Community attitudes towards the landfill have rendered the approval of the development inappropriate Alkina Holdings Pty Ltd has had sufficient time to have their proposal for works application approved - as per paragraphs 38 and 42 of the Application, Alkina Holdings Pty Ltd entered the Option Agreement in February 2017 and didn't lodge a 'fresh' Works Approval Application until July 2017; The proposal is not consistent with the principles of sustainable development; and The proposal is not consistent with State and Regional Strategic Plans and Policies for use of rural land. 	
55	19 Jan 18	Avon Valley Residents Assoc	-	<ul style="list-style-type: none"> Objection to proposal: There is no demonstrated need for a landfill. Application has been submitted as a JDAP application, and no costings submitted to justify it can be treated as a DAP application. Aspects of the proposal such as site works and access standards are lesser than the SITA proposal. The Shire of York advertising period should be extended following receipt of above costings. There has been sufficient time permitted to substantially commence development. The development was not substantially commenced as required by condition 9 of the approval and has lapsed. Concern regarding inability of Alkina to achieve a works approval, in light of SITA's previous works. Submission to DWER was attached. Insufficient information on hydrology and water table. Applicant has demonstrated a reluctance to liaise with the Shire despite the Shire being charged with oversight of the project and repeated requests from the Shire for further information. Alkina have not engaged with the council or community on proposal. Should the application to amend condition 9 be approved, the following additional conditions should be imposed: <ul style="list-style-type: none"> Approval is restricted to the single lot and specific area as defined in any DWER works approval that may be issued. 	<p>Comments regarding overall consistency with the Scheme (including impacts on amenity and tourism), Strategic documents considered by SAT (including Waste Strategy and associated documents), State Planning Policies and Regional Plans are noted. The Shire notes that there is a lack of strategic planning to justify the landfill location and need for a landfill. However, there has not been a substantial change in the policy and strategy framework (note comments in RAR on areas where there may be amendments to consider) since determination of the application and it is not within the jurisdiction of this application to reconsider matters which have already been determined by the SAT.</p> <p>The estimated cost of development on the original development application submitted 17 December 2013 was \$46 million (stage 1 was 7.8 million). The application fee was based on \$46 million. The current application does propose a lesser standard for some aspects of works such as internal road standards. This is outlined in the Works Approval Application. It is considered that the amendments to standards (whether these are accepted or not, as the standard of road construction is to be managed as a condition of approval) will not reduce the overall estimated cost of development to less than \$10 million, which is the mandatory threshold requiring a DAP application to be submitted, or \$2 million which is the 'opt-in' dap threshold where the applicant can request that the application be determined by the JDAP. The estimated cost of development is immaterial to the application fee for a form 2/amendment application which is a fixed rate.</p> <p>Discussion on the application for extension is discussed in the Planning Assessment section within the RAR.</p>

				<ul style="list-style-type: none"> ○ Approval is dependent on the extra work being undertaken on the east side of the Thirteen Mile Brook as per the Rockwater Pty Ltd submission to the DWER (attached). ○ Approval dependent on the results of Extra Condition 2. ○ A \$20 million dollar rehabilitation bond in the form of a bank guarantee in favour of the Shire to be lodged with the Shire prior to commencement of any site works. 	<p>Relevant environmental and environmental health issues (including contingencies and appropriate conditions of development approval) are discussed and responded to in the 'Planning Assessment' section within the RAR. Officers have noted that there is insufficient information to determine that the proposal will not have an adverse impact on natural resources or the environment.</p> <p>The competency of the applicant is not listed as a matter in the Scheme or Regulations to be given due regard in assessment of an application. It is a relevant matter in the DWER works application approval, which is specific to an applicant.</p> <p>The relationship/communication between the applicant and Shire is not a planning consideration to be given regard for this application.</p> <p>Public consultation undertaken by the applicant is not a planning consideration for this application.</p>

67	9 Jan 18	Alan George Ferguson	17 New St, York	<ul style="list-style-type: none"> • The proposal will impact amenity, heritage and the lifestyle of York. • There are no quantified benefits to the community as a result of the proposal. • The proposal will result in an unacceptable risk to the community, road users and the environment. • Great Southern Highway is not a safe and appropriate road to position a landfill. • More appropriate and suitable sites are available for use as landfills. • There is substantial community objection to the landfill, which has increased over the last 6 years. • The proposal will put undue and unnecessary strain on local emergency service volunteers. • The landfill does not encourage tourism in the Shire of York. Many York community members and businesses rely on tourism. With the increase in traffic along Great Southern Highway tourism will seriously be affected in York thus affecting the enjoyment and quality of the lives of community members. • The proposal is not consistent with the principals of sustainable development. • The proposal is not consistent with State and Regional Strategic Plans & Policies for use of rural land. • There are sufficient landfills available to cater for metropolitan waste. The reduction of waste and the increase in recycling practices have increased the life of existing landfills. • Landfill technology is out dated and there are better alternatives available. • There is no facility of this type in the locality and the landfill is foreign to rural amenity. • The proposal is ad-hoc and is not considered proper and orderly planning. • York is a seismic activity hot spot, so there is great concern over lining damage within the landfill. Earthquakes can destroy liners. • The precautionary principle and the principle of sustainable development are not being considered as a landfill will have a huge negative impact on our legacy for future generations. 	<p>Fire Management and associated considerations are discussed and responded to within the 'Planning Assessment' section in the Planning Assessment within the RAR report.</p> <p>Community opposition is noted as a reason that the extension of period to substantially commence the development should not be supported.</p>
