## MESSAGE FROM THE PRESIDENT

The Shire of York, along with many other rural local governments in Western Australia, faces dual community expectations of maintaining or improving levels of service while limiting rates impacts and maintaining financial sustainability.

This is a major challenge, especially in the context of relatively low levels of growth in the Shire rating base, a history of shift in costs from other levels of government and ageing infrastructure. The current York community like many others, has also inherited a legacy of deferred investment in maintaining and renewing assets such that some are starting to fail.

This plan represents the Council's best judgement on the spread of investment in infrastructure, services and activities to deliver results that will significantly contribute to achieving the community's aspirations and the Council's objectives in delivering the Strategic Community Plan over the next ten years.

The biggest risk faced by the Council in seeking a sustainable financial plan for the future is the extent to which there is a gap between the infrastructure requirements for renewals and the level of funding that is available without overburdening the ratepayers of the Shire. We know there is a gap, we just don't know how big that gap is. This plan provides the resources to quantify the gap and start to develop strategies to narrow it along with instituting better practices for the management of assets.. This will be further addressed in the next strategic review (in 2 years) when we should have far better knowledge of our assets and our options than we do at this time. While assets are a big focus of attention so are the other people oriented services that the Shire is involved in.

I commend this plan to you along with the Strategic Community Plan, and Corporate Business Plan which together set the direction and provide the resources for a bright future for York town and country.

Cr David Wallace  
President, Shire of York

## INTRODUCTION

Welcome to the Shire of York's Long Term Financial Plan (LTFP). The LTFP is a the document which sets out the Council's ten year investment program and its overall approach to maintaining financial sustainability. The Corporate Plan provides a more detailed program for the first four years of this ten year plan.

The purpose of the LTFP is to guide and inform decision-making by establishing the framework upon which sound financial decisions can be made. It is a financial modelling tool used to assess capacity to implement the Strategic Community Plan and to provide transparency and accountability to the community in relation to the Shire's finances. It also provides an opportunity for early identificaiton of financial management issues.

The LTFP informs decisions about the speed at which a community can achieve its strategic aspirations. It provides a mechanism by which the Council can test the extent to which the community wishes to use different financial levers to fund any program, including rates revenue, fees and charges and debt. It will also highlight, in conjunction with information on asset maintainence and renewal costs, any gaps in funding and risks to asset value, and to levels of service delivery in the long term.

This LTFP sets out:

- the strategic context
- financial goals and challenges
- strategies for financial sustainability
- projected financial position
- assumptions, adjustments and risk assessment
- the capital works program
- financial performance monitoring
- sensitivity analysis and performance monitoring
- financial implications

This plan was adopted on 27June2016. It will be reviewed in 2017/18 with and every two years thereafter. The two yearly cycles will alternate between a mini strategic review and a major strategic review, as shown in the planning cycle diagram on page 8.

## Key Points of the Long Term Financial Plan

### OVERVIEW

- Total Council rates revenue increase over the first four years of the plan will be as follows:

○ 2016/17	3.50%
○ 2017/18	3.75%
○ 2018/19	4.00%
○ 2019/20	4.25%

Thereafter the forecasts are based on rates revenue increases of around 5% per annum (subject to future reviews addressing the real costs of asset renewal when known)

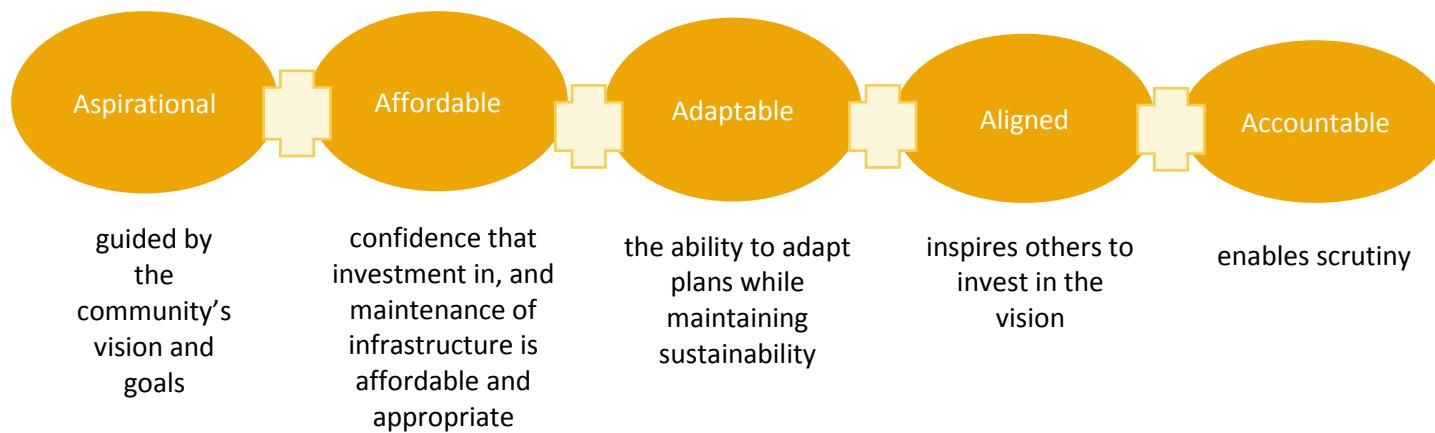

- Levels of service are largely maintained at current levels with a small increase in some targeted areas
- Funding of an asset reserve account pending improved knowledge of asset condition and renew requirements to be developed in the first two years
- Conservative use of debt to fund major new assets or significant upgrades

- Review of land and property portfolio to ascertain highest and best use, create new income streams and release equity for reinvestment if possible
- Very minimal increase in staff over the life of the plan

## WESTERN AUSTRALIA LOCAL GOVERNMENT INTEGRATED PLANNING AND REPORTING FRAMEWORK

The Integrated Planning and Reporting Framework is shown in the diagram on the next page. The idea behind the framework is to ensure that the Council's decisions take the community's aspirations into account and deliver the best results possible with the available resources.

The Strategic Community Plan sets the scene for the whole framework – it expresses the community's vision and priorities for the future and shows how the Council and community intend to make progress over a ten year period. The '5 As' set out below identify the qualities which a good Strategic Community Plan should exhibit.

## THE PLANNING CYCLE

The Strategic Community Plan is a ten year plan. However, it is not fixed for ten years – it would be long out of date by then. Rather, it is a “rolling” plan which is reviewed every two years, as shown in the diagram below. The two yearly reviews alternate between a minor review (updating as needed) and a major review (going through all the steps again).

The plan is continuously looking ahead, so each review keeps a ten year horizon. This is to ensure that the best decisions are made in the short to medium term.

The detailed implementation for the first four years is covered in the Corporate Business Plan. The Long Term Financial Plan, Asset Management Plans and Workforce Plan – show how the Plan will be managed and resourced.

The Annual Budget relates to that year’s “slice” of the Corporate Business Plan, with any necessary adjustments made through the Annual Budget process.

## CONTEXT

### THE COMMUNITY'S VISION

The following vision was distilled from the 2015 community survey results and the subsequent 2016 engagement processes.

**"A vibrant and inviting agricultural, heritage and tourist town and a Shire community that is focused on and works collaboratively to improve and promote the [town and the Shire] of York as a destination and wonderful place to live"**

### THE COMMUNITY'S ASPIRATIONS: FIVE THEMES

- **'THE PLACE TO LIVE:** To be a place which is attractive and accessible for the young and elderly and attracts people in the middle age groups to work and settle in the Shire. The York community aspires to a balanced population structure in the short and long term.
- **A LEADER IN CULTURAL HERITAGE AND ENVIRONMENT:** To be a place which is renowned for its cultural heritage and the quality of its natural environment, and for the care taken by the community of both.
- **DRIVING THE YORK ECONOMY FORWARD:** To have a vital, diverse and prosperous local economy which is sustainable in the long term, makes sustainable use of its natural and built heritage and community assets and delivers benefit in the form of local jobs, business opportunities and a positive image for the Shire.

- **BUILT FOR RESILIENCE:** To have secured an infrastructure base (e.g. buildings, roads, footpaths, parks, communications, water and energy) which is affordable, is managed at a level of risk accepted by the community, supports a sustainable environment, increases rural and town resilience, and is responsive to community needs.
- **LEADERSHIP AND GOVERNANCE:** To be a community where there is effective and responsive leadership and governance, a sense of collective purpose and shared direction and a willingness and desire to work together for that future.

## COUNCIL'S STRATEGIC PRIORITIES

The Council's strategic priorities over the next ten years are:

- building a strong economic future
- infrastructure: investing to retain asset value and positioning the community to be able to maintain the value of existing assets in the long term and reduce exposure of assets and associated services to the risk of decline
- being development ready
- maintaining levels of service with some limited levels of service increases where these deliver against strong community aspirations and can be accommodated with minimal overall rates impact
- advancing selected community partnership based projects
- achieving change via strong community networks and action
- significant advocacy on key issues facing the Shire
- developing strong governance and leadership capability
- exploring additional revenue sources

## FINANCIAL CHALLENGES

### LOCAL GOVERNMENT: AN ASSET INTENSIVE BUSINESS

This is THE GREATEST FINANCIAL AND STRATEGIC CHALLENGE for the local government sector and particularly for smaller rural Shires. Assets underpin almost all aspects of Shire services from roads, to parks, recreation facilities, buildings, footpaths, street lights, bridges, drainage and waste facilities.

The quality of a service is hugely dependent on the quality of the asset itself. The successful functioning of the local economy and community is heavily dependent on the efficiency and quality of infrastructure.

To maintain service levels, the assets need to be maintained and replaced at that optimal time before they start to significantly decline. Central to this is ensuring funding of maintenance and the renewal of assets is sufficient and available at the right time.

The level of funding required consumes a very large part of the total Shire budget. Faced with demands from the community to keep rates low, it is very easy to postpone necessary expenditure when the signs of decline are incremental and hard to see in the short term.

This is the situation that the York community faces. The community has inherited a funding gap and must, along with all the other pressures on the Shire budget, try to close that gap before services decline. If it cannot, the community will have to re-set and make clear the service levels it can afford.

Work has been undertaken in the last three years to improve asset information, mainly in the road and drainage areas (hydraulic model and condition rating) but further work is needed to finalise costs against standards across all asset types. The time to make a full decision on levels of service versus affordability is in 2018/19 when there is better information about what it really costs to maintain and renew assets.

Significant investments have been made for this to occur over the next two years. Although the outcome of this investment will not be obvious in the short term, it will stand the community in good stead to have this work done well now.

## LIMITED REVENUE SOURCES

- a heavy reliance on rates revenue and external funding grants. This constrains the ability of the community to address significant issues and deliver new programs.

## INFRASTRUCTURE FUNDING GAPS AND SERVICE RISKS

- funding gaps for replacement of Council assets with some assets facing decline and risk to service levels.

The 2012/13 LTFP identified a significant gap between the level of funding needed to replace assets at the optimal time and the amount of funding proposed to be set aside. The LTFP noted that the quality of information about actual asset condition and renewals needs was limited and that work of asset plan improvement was needed.

## GRANTS UNCERTAINTY

- uncertainty about future external grants funding levels (Federal Assistance Grants, Roads to Recovery, Regional Roads Grants and Blackspots Grants) which makes it difficult to plan in the long term for stable levels of service.
- constrained capacity to plan and apply for external funding for large comprehensive projects receiving external funding (e.g. Royalties for Regions projects) which will allow the Council to drive major change projects forward.

## BALANCING RISK WITH AFFORDABILITY

- exposure to risk, particularly in the infrastructure area can bring additional costs in the longer term but the capacity to address those risks, either because of immediate impacts of limited or asset knowledge, is a problem for York as it is for many other small rural communities.

## INTER-GENERATIONAL EQUITY

- Like many small communities, the Shire of York has inherited deferred funding of assets. This is at a time of increased pressure on existing services from more frequent and intense storm events.
- Finding ways to avoid passing the same issues on to future communities while making sure that future generations pay a fair share of the cost of new works and infrastructure is a challenge.

## HOW TO USE DEBT?

- Borrowing to pay for new works is a tool that can help smooth costs and ensure intergenerational equity. At the same time, it is important to constrain the level of debt within the capacity to pay.
- The Shire has relatively low levels of debt and has some capacity to use this tool to address impacts of major projects. Clarity about the level of comfort in using debt over time is needed.

## FINANCIAL MANAGEMENT PRINCIPLES

The Council has adopted a Financial Planning and Sustainability Policy (G4.3) which sets out a framework for financial management. The key points are that the Shire must:

- plan for a balanced budget
- maintain sufficient cash reserves to meet short-term working capital requirements
- have a fully funded capital infrastructure program where each source of funding is identified and secured.
- Give priority to renewals funding in a situation of constrained resources
- Maintain its asset base and build cash reserves to fund future works
- Operate without imposing excessive debt or rates increases on future generations
- Balance rates increases to community capacity and sensitivity to increases

### INTERGENERATIONAL EQUITY

- The full cost of providing new assets will be met equitably by all generations of ratepayers who enjoy the benefits of those services or assets.
- Current generations will not be called upon to fully fund the acquisition of assets or services benefit or will be used by future generations.

- Current generations will not enjoy the consumption of services or assets at less than their real cost, thereby leaving an unfunded financial burden (liability) to future generations

### APPROACH TO BORROWING

- Borrowings must only serve as a funding source for the acquisition or construction of new assets or significant upgrade of existing assets.
- Borrowings must never be used to fund operational expenditure.
- Capacity to pay must be assessed prior to borrowing and the Shire must ensure that the community is not burdened by unnecessary risk.
- Appropriate levels of indebtedness must be maintained (guided by the results of debt ratios).
- Any borrowing period will relate to the life of the asset.

## STRATEGY FOR FINANCIAL SUSTAINABILITY

The Council has adopted the following strategy for the ten year period:

- levels of service: largely maintain current levels of service with small number of targeted increases to service levels in limited areas.
- continue to improve asset knowledge such that asset renewals investment can be optimised.
- build an infrastructure funding ‘place holder’ or reserve which allows more detailed allocation to asset renewal once asset planning and review is completed
- keep rates increases at around 5% per year (2-3% real increase over inflation). Note: future reviews will need to address real costs of asset renewal on budgets once this is known.
- use borrowings to fund selected major new asset creation and/or major upgrades to existing assets where:
  - there is high risk of existing asset or service failure and the works could not otherwise be funded without significant rates increases. Note: this must include a significant new level of service;
  - a new asset service or network is being created which will significantly benefit future generations

The following two asset classes and service have been identified as being eligible for debt funding over the period:

- swimming pool upgrade (Years 1-3)
- funding of the new catchment based drainage system from Year 4.
- Keep debt levels to 10% below statutory ratios to allow future generations ‘head-room’ for new decisions.
- review land and property portfolio management (Year 2) to see how it can be managed to provide the Council with alternative revenue sources. This will need to be carefully considered so that property that is strategically significant is retained and that disposal, if any, is optimal in terms of returns. Full community consultation will be undertaken on this strategy.

## ASSUMPTIONS

	2016/17	2017/18	2018/19	2019/20	2020/21	2021/22	2022/23	2023/24	2024/25	2025/26

		State approach to growth management will continue				
		No major change to legislative environment other than in the area of building control.				
Staffing levels		1 new FTE from 2016/17 – asset management data capture, maintenance and renewals costings, asset plans development (reduced external consultants costs apart from technical guidance and review)				
		Note: the currently funded community/ economic development officer position will be filled from 2016/17.				
Other		Assumed level of external funding for some key operating and capital projects. These projects will not proceed at budgeted time if funding not granted.				
		No assumptions in relation to land sales.				

## FINANCIAL RISK ASSESSMENT

The Shire of York has adopted a Risk Assessment and Management Policy that requires the development and adoption of a risk management framework. In the meantime, the Council has undertaken a preliminary assessment of the risks to sustainable financial management. These are outlined in the following table.

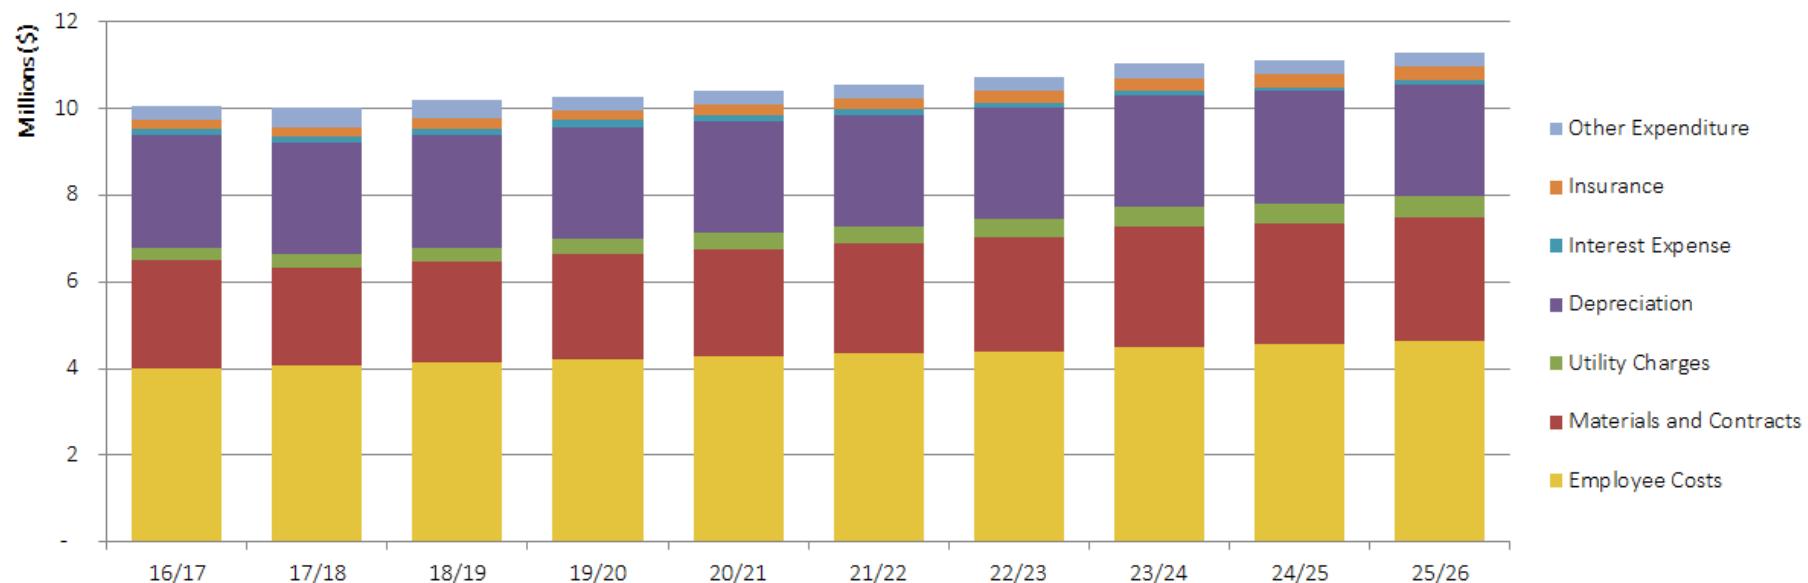

Risk Category (where risk arises)	Risk Description	Risk Controls
Financial Risks		
External revenue sources	<ul style="list-style-type: none"> <li>■ Revenue shortfall from such factors as external grants/ funding, fees and charges, rates and cost shifting from State and/or Federal government to local government</li> </ul>	<ul style="list-style-type: none"> <li>■ Long Term Financial Plan</li> <li>■ Budget process</li> <li>■ Lobbying and advocacy</li> <li>■ External grants management and acquittal processes</li> <li>■ IPR communication plan</li> </ul>
Project costing and management	<ul style="list-style-type: none"> <li>■ Capital costs above assumptions</li> </ul>	<ul style="list-style-type: none"> <li>■ Long Term Financial Plan</li> <li>■ Budget process</li> <li>■ Capacity building</li> <li>■ Asset Management Plans</li> <li>■ Rigour of project management</li> </ul>
Staff costs	<ul style="list-style-type: none"> <li>■ Employee costs above assumptions</li> </ul>	<ul style="list-style-type: none"> <li>■ Long Term Financial Plan</li> <li>■ Workforce Plan (WFP)</li> <li>■ Operational reviews</li> </ul>
Interest rates	<ul style="list-style-type: none"> <li>■ Higher than anticipated (low risk)</li> </ul>	<ul style="list-style-type: none"> <li>■ Maintain overview of interest rates and consider at each point in review cycle.</li> </ul>

## SUMMARY OF PROJECTED FINANCIAL POSITION

### Forecast Operating Expenditure

The components of operating expenditure are expected to remain relatively stable over the period. Depreciation, employee costs and materials and contracts remain the dominant operating expenditure components.

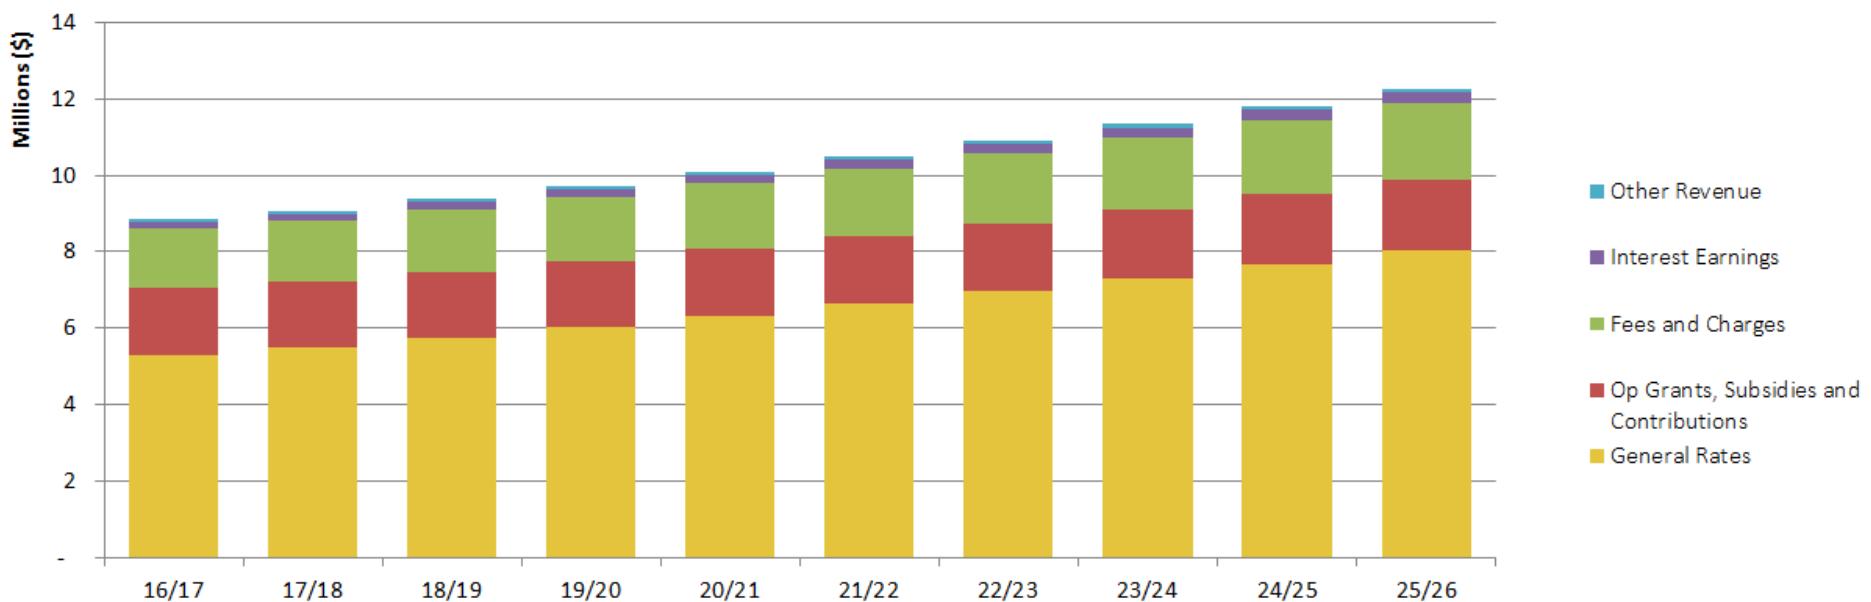

The Shire will ensure value for money in the procurement of goods and services, as well as ensuring efficiency in operational practices.

## Forecast Operating Revenue

This graph demonstrates the reliance that the Shire has on general rates, and subsidies and grants to fund its operational expenditure. This reliance means that in most instances any increase in expenditure comes as a direct financial cost to ratepayers unless it can be funded by grant allocations.

The Council understands the need to keep any rate revenue increases to a reasonable level whilst balancing the long term requirements of the Shire.

## SUMMARY OF OUR WORKFORCE PLAN

A review of the Shire's service delivery structure, taking into account the direction set by the Strategic Community Plan and the Corporate Business Plan was adopted by Council in June. The Shire's Workforce Plan will be updated during the 2016/17 Financial Year.

## LINK TO ASSET MANAGEMENT PLANS

The Shire of York is responsible for the following assets:

- roads
- heritage buildings
- drainage (stormwater)
- footpaths and trails
- buildings and land
- public open space
- bridges
- recreation facilities
- public health – septic ponds and waste

The Shire is not in a position to provide detailed information on proposed asset/ infrastructure, either technical service levels or fully tested and documented renewals and upgrades needs, such that there is a clear relationship between expenditure needs and proposed spend. The roads and bridges asset plan is the most advanced but still requires further condition data and clearly specified technical levels of service standards. In

the meantime, general levels of service are specified in the Summary of Service Plans. The budget provides for developing improved information for the following asset classes is available for the 2017/18 minor strategic review: roads and bridges, footpaths and trails, heritage, public open space and buildings.

## SENSITIVITY ANALYSIS AND SCENARIO MODELLING

Scenario modelling was undertaken in the course of preparing the LTFP. All three scenarios modelled indicated that in order to fund asset renewals, replacements and upgrades, increases to council controlled revenue are needed in excess of CPI. The Table below outlines the scenarios and broad results.

### GENERAL CONCLUSIONS:

- The Council has a legislative responsibility to maintain asset value or make clear statements that services will be reduced. There is no appetite to make any definitive decision on asset deline and levels of service until better information on costs is available.
- Given the size of the budget expenditure on asset driven services, Council must invest in developing a better understanding of asset renewal costs to be able to make informed strategic decisions about levels of service investment across the board and questions of lowering or changing service level expectations.
- Until that clear information is available, the preferred path is to maintain rates revenue at a level which allows for some progress on risk and strategic objectives, particularly where the latter helps build the local economy (Scenario C).
- The level of funding under Scenario C explicitly does not eliminate underpinning structural issues and the community will continue to face significant funding gaps and associated risk. During the course of this LTFP it will be moving where possible to close those gaps.

Scenarios	Key Features	Levels of Service Impacts	Risk Implications
A: Business as Usual	<ul style="list-style-type: none"> <li>■ existing expenditure only plus inflation</li> </ul>	<ul style="list-style-type: none"> <li>■ significant further decline in all asset areas and levels of service</li> <li>■ able to deliver on CDO and EDO activities</li> </ul>	<ul style="list-style-type: none"> <li>■ does not address funding gaps or long term asset and service risks</li> </ul>
B: Positioning to Address Risk	<ul style="list-style-type: none"> <li>■ inclusion of all <b>known</b> risk expenditure in addition to existing levels of service, other than for roads which retained current rates/ priorities for addressing Condition 4 and 5 roads.</li> <li>■ Investment in improved asset planning to reduce risk</li> <li>■ Incusion of infrastructure reserve for allocation within ten year period and for Year 4 onward stomrwater investment</li> </ul>	<ul style="list-style-type: none"> <li>■ slows decline for some built assets and aspects of parks</li> <li>■ Provides community with a higher level of service around asst planning and certainty of costs</li> <li>■ able to deliver on CDO and EDO activities</li> </ul>	<ul style="list-style-type: none"> <li>■ positions the community to better cost and make decisions on funding gaps</li> <li>■ begins to address funding gaps but not at level to significantly reduce the current level of risk in the short term</li> <li>■ reduces risks from funding gap in the longer term but unlikely to be sufficient to address all risks</li> <li>■ relies on external funding to make significant progress on roads renewals backlog</li> </ul>
C: Progress on Risk and Some Strategic Objectives	<ul style="list-style-type: none"> <li>■ inclusion of all <b>known</b> risk expenditure in addition to existing levels of service, other than for roads which retained current rates/ priorities for addressing Condition 4 and 5 roads.</li> <li>■ investment in improved asset planning to reduce risk</li> <li>■ provision for future infrastructure renewals</li> <li>■ inclusion of small level of service increases to advance key projects</li> <li>■ smoothing and optimisation of timing to rates reduce impacts</li> <li>■ reduced immediate rates increase .</li> <li>■ altered timing for some projects to allow for rates impact and organisation capacity to deliver</li> </ul>	<ul style="list-style-type: none"> <li>■ slows decline for some built assets and aspects of parks</li> <li>■ Provides community with a higher level of service around asset planning and certainty of costs</li> <li>■ able to deliver on CDO and EDO activities</li> <li>■ advances small incremental/ community based projects focused on long term community objectives</li> <li>■ increases capability to seek more comprehensive external funding for major projects.</li> </ul>	<ul style="list-style-type: none"> <li>■ positions the community to better cost and make decisions on funding gaps</li> <li>■ begins to address funding gaps but not at level to significantly reduce the current level of risk in the short term</li> <li>■ reduces risks from funding gap in the longer term but unlikely to be sufficient to address all risks</li> <li>■ relies on external funding to make significant progress on roads renewals backlog</li> </ul>

## HOW WILL WE KNOW IF THE PLAN IS SUCCEEDING?

	Indicator	Desired Trend/Target
	Financial Sustainability	
H	<p>Operating Surplus Ratio The extent to which revenues raised cover operational expense only or are available for capital funding purposes.</p>	10% or greater
H	<p>Current Ratio The liquidity position of a local government that has arisen from the past year's transactions.</p>	1:1 or greater
H	<p>Debt Service Cover Ratio The ratio of cash available for debt servicing to interest, principal and lease payments.</p>	2 or greater
H	<p>Own Source Revenue Coverage Ratio An indicator of a local government's ability to cover its costs through its own revenue efforts.</p>	Between 40% and 60%
	Asset Management	
H	<p>Asset Consumption Ratio The ratio highlights the aged condition of the local government's stock of physical assets.</p>	50% or greater
H	<p>Asset Sustainability Ratio Measures the extent to which assets managed by the local government are being replaced as they reach the end of their useful lives.</p>	90% or greater
H	<p>Asset Renewal Funding Ratio This indicates whether the local government has the financial capacity to fund asset renewal as required, and can continue to provide existing levels of services in future, without:</p> <ul style="list-style-type: none"> <li>- additional operating income;</li> <li>- reductions in operating expenses; or</li> <li>- an increase in net financial liabilities above that currently projected.</li> </ul>	Between 75% - 95%.
