Trees and shade top the community's wish list

The Shire of York recently checked back in with the community to see whether the concept plans for the Macartney Street Green Space captured what people had told us over the last couple of years.

Overall, respondents felt the concept plan reflected earlier community feedback.

See the survey data below

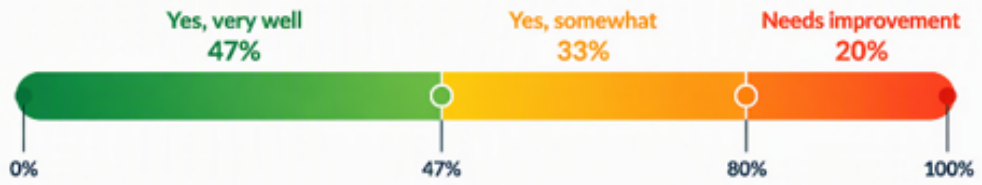

Q1 Trees, greenery, and shade were a top priority. Looking at the concept design, do you feel this has been reflected?

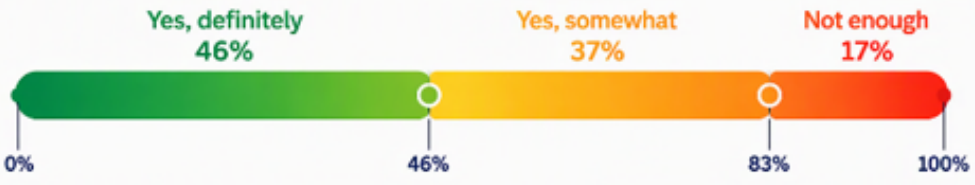

Q2 Seating and places to relax/socialise were highlighted as important. Does the design include enough seating and spaces for people to gather?

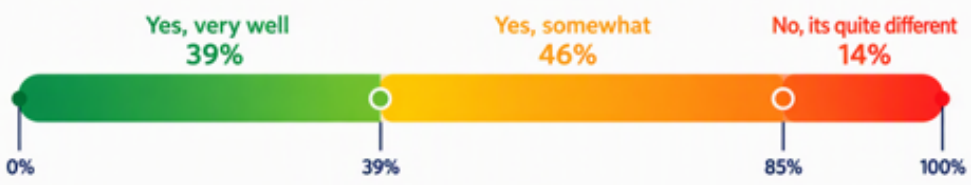

Q3 Connection between Avon Terrace and Avon Park was a key theme. Does the concept create a clear and inviting link between the Main Street and the park?

Q4 Flexible community uses (markets, events, performances, youth activities) were widely supported. Does the concept provide the kind of flexible spaces the community wanted?

Q5 Overall, does the concept design reflect what you shared in the Listening Report?
