Re: SITA ALLAWUNA FARM LANDFILL.

101  
DATE 2nd May.....

NAME: Mikki Waterton

ADDRESS: YORK WA 6302

Dear Sir,

The amended application from Sita Allawuna Farm Landfill proposed use does not change, the proposal is still the same as original, therefore the previous submissions to the Shire of York against the original application are still valid. The Shire of York's Planning Officer's report is therefore still valid. The JDAP's reasons for upholding the Shire of York's Council's decision and refusing the Sita Allawuna Farm Landfill, are still valid.

I object to this proposed Sita Allawuna Farm Landfill. It should not be permitted as it does not fit within the Shire of York's Town Planning Scheme No.2, which states, under the General Agriculture zone "...to ensure the continuation of broad-acre agriculture as the principal land use in the district, encouraging where appropriate the retention and expansion of agricultural activities". Landfill enterprises are not an agricultural activity.

Landfills do not enhance or preserve our agricultural land but instead destroys our environment. Landfills should not be placed in our agricultural farmland. It will not benefit York. York is a historic tourist town, with agriculture, tourism and is a popular destination for retiree's and growing young families.

This proposed Landfill will not benefit York. I ask that the proposal not be accepted.

IT TAKES FOREVER TO GET OUT OF YORK  
AND THIS HORROR DUMP WILL CAUSE A  
LOT OF WORRY & DELAYS. WHY US.

Yours sincerely,

SIGNATURE

ADDRESS:..... York 6302

Dear Sir,

The amended application from Sita Allawuna Farm Landfill proposed use does not change, the proposal is still the same as original, therefore the previous submissions to the Shire of York against the original application are still valid. The Shire of York's Planning Officer's report is therefore still valid. The JDAP's reasons for upholding the Shire of York's Council's decision and refusing the Sita Allawuna Farm Landfill, are still valid.

I object to this proposed Sita Allawuna Farm Landfill. It should not be permitted as it does not fit within the Shire of York's Town Planning Scheme No.2, which states, under the General Agriculture zone "...to ensure the continuation of broad-acre agriculture as the principal land use in the district, encouraging where appropriate the retention and expansion of agricultural activities". Landfill enterprises are not an agricultural activity.

Landfills do not enhance or preserve our agricultural land but instead destroys our environment. Landfills should not be placed in our agricultural farmland. It will not benefit York. York is a historic tourist town, with agriculture, tourism and is a popular destination for retiree's and growing young families.

This proposed Landfill will not benefit York. I ask that the proposal not be accepted.

Yours sincerely,

The Shire of York's Planning Officer's report is therefore still valid. The JDAP's reasons for upholding the Shire of York's Council's decision and refusing the Sita Allawuna Farm Landfill, are still valid.

I object to this proposed Sita Allawuna Farm Landfill (rubbish dump). This should not be permitted as it does not fit within the Shire of York's Town Planning Scheme No.2, which states, under the General Agriculture zone "...to ensure the continuation of broad-acre agriculture as the principal land use in the district, encouraging where appropriate the retention and expansion of agricultural activities". Landfill enterprises are not an agricultural activity, should not be placed in our broad-acre farms, but instead Landfills destroy and poison our environment. This area produces sheep, cattle, wool, grain etc. for human consumption. Good farmland in a high and consistant rainfall area should be protected. Metropolitan population is expected to reach 3 million in the near future, creating more rubbish. Allawuna Farm and surrounds has abundant paleo water channels, flowing into the Mundaring Weir Water Catchment area. Fresh water is a precious and finite commodity and must be protected. The main access road to York, The Great Southern Highway, is extremely dangerous and is not suitable for the extra trucks and roadtrains this proposal will bring.

York is a historic tourist town, and is a popular destination for tourists, retiree's and growing young families, and is a lovely town to live, work and visit.

This proposed Landfill will not benefit York. I ask that the proposal not be accepted.

NAME:..... *Jeanne + Ron Lee* .....

ADDRESS:..... *York 6302* .....

Dear Sir,

The amended application from Sita Allawuna Farm Landfill proposed use does not change, the proposal is still the same as original, therefore the previous submissions to the Shire of York against the original application are still valid. The Shire of York's Planning Officer's report is therefore still valid. The JDAP's reasons for upholding the Shire of York's Council's decision and refusing the Sita Allawuna Farm Landfill, are still valid.

I object to this proposed Sita Allawuna Farm Landfill (rubbish dump). This should not be permitted as it does not fit within the Shire of York's Town Planning Scheme No.2, which states, under the General Agriculture zone "...to ensure the continuation of broad-acre agriculture as the principal land use in the district, encouraging where appropriate the retention and expansion of agricultural activities". Landfill enterprises are not an agricultural activity, should not be placed in our broad-acre farms , but instead Landfills destroy and poison our environment. This area produces sheep, cattle, wool, grain etc. for human consumption. Good farmland in a high and consistant rainfall area should be protected. Metropolitan population is expected to reach 3 million in the near future, creating more rubbish. Allawuna Farm and surrounds has abundant paleo water channels, flowing into the Mundaring Weir Water Catchment area. Fresh water is a precious and finite commodity and must be protected. The main access road to York, The Great Southern Highway, is extremely dangerous and is not suitable for the extra trucks and roadtrains this proposal will bring.

York is a historic tourist town, and is a popular destination for tourists, retiree's and growing young families, and is a lovely town to live, work and visit.

This proposed Landfill will not benefit York. I ask that the proposal not be accepted.

Yours sincerely,

*R. Lee*

ADDRESS: YORK 6302

Dear Sir,

The amended application from Sita Allawuna Farm Landfill proposed use does not change, the proposal is still the same as original, therefore the previous submissions to the Shire of York against the original application are still valid. The Shire of York's Planning Officer's report is therefore still valid. The JDAP's reasons for upholding the Shire of York's Council's decision and refusing the Sita Allawuna Farm Landfill, are still valid.

I object to this proposed Sita Allawuna Farm Landfill (rubbish dump). This should not be permitted as it does not fit within the Shire of York's Town Planning Scheme No.2, which states, under the General Agriculture zone "...to ensure the continuation of broad-acre agriculture as the principal land use in the district, encouraging where appropriate the retention and expansion of agricultural activities". Landfill enterprises are not an agricultural activity, should not be placed in our broad-acre farms, but instead Landfills destroy and poison our environment. This area produces sheep, cattle, wool, grain etc. for human consumption. Good farmland in a high and consistent rainfall area should be protected. Metropolitan population is expected to reach 3 million in the near future, creating more rubbish. Allawuna Farm and surrounds has abundant paleo water channels, flowing into the Mundaring Weir Water Catchment area. Fresh water is a precious and finite commodity and must be protected. The main access road to York, The Great Southern Highway, is extremely dangerous and is not suitable for the extra trucks and roadtrains this proposal will bring.

York is a historic tourist town, and is a popular destination for tourists, retiree's and growing young families, and is a lovely town to live, work and visit.

This proposed Landfill will not benefit York. I ask that the proposal not be accepted.

Yours sincerely,

SIGNATURE

The JDAP's reasons for upholding the Shire of York's Council's decision and refusing the Sita Allawuna Farm Landfill, are still valid.

I object to this proposed Sita Allawuna Farm Landfill (rubbish dump). This should not be permitted as it does not fit within the Shire of York's Town Planning Scheme No.2, which states, under the General Agriculture zone "...to ensure the continuation of broad-acre agriculture as the principal land use in the district, encouraging where appropriate the retention and expansion of agricultural activities". Landfill enterprises are not an agricultural activity, should not be placed in our broad-acre farms, but instead Landfills destroy and poison our environment. This area produces sheep, cattle, wool, grain etc. for human consumption. Good farmland in a high and consistant rainfall area should be protected. Metropolitan population is expected to reach 3 million in the near future, creating more rubbish. Allawuna Farm and surrounds has abundant paleo water channels, flowing into the Mundaring Weir Water Catchment area. Fresh water is a precious and finite commodity and must be protected. The main access road to York, The Great Southern Highway, is extremely dangerous and is not suitable for the extra trucks and roadtrains this proposal will bring.

York is a historic tourist town, and is a popular destination for tourists, retiree's and growing young families, and is a lovely town to live, work and visit.

This proposed Landfill will not benefit York. I ask that the proposal not be accepted.

Yours sincerely,

I object to this proposed Sita Allawuna Farm Landfill (rubbish dump). This should not be permitted as it does not fit within the Shire of York's Town Planning Scheme No.2, which states, under the General Agriculture zone "...to ensure the continuation of broad-acre agriculture as the principal land use in the district, encouraging where appropriate the retention and expansion of agricultural activities". Landfill enterprises are not an agricultural activity, should not be placed in our broad-acre farms, but instead Landfills destroy and poison our environment. This area produces sheep, cattle, wool, grain etc. for human consumption. Good farmland in a high and consistent rainfall area should be protected. Metropolitan population is expected to reach 3 million in the near future, creating more rubbish. Allawuna Farm and surrounds has abundant paleo water channels, flowing into the Mundaring Weir Water Catchment area. Fresh water is a precious and finite commodity and must be protected. The main access road to York, The Great Southern Highway, is extremely dangerous and is not suitable for the extra trucks and roadtrains this proposal will bring.

York is a historic tourist town, and is a popular destination for tourists, retiree's and growing young families, and is a lovely town to live, work and visit.

This proposed Landfill will not benefit York. I ask that the proposal not be accepted.

Yours sincerely,

Dear Sir,

The amended application from Sita Allawuna Farm Landfill proposed use does not change, the proposal is still the same as original, therefore the previous submissions to the Shire of York against the original application are still valid. The Shire of York's Planning Officer's report is therefore still valid. The JDAP's reasons for upholding the Shire of York's Council's decision and refusing the Sita Allawuna Farm Landfill, are still valid.

I object to this proposed Sita Allawuna Farm Landfill (rubbish dump). This should not be permitted as it does not fit within the Shire of York's Town Planning Scheme No.2, which states, under the General Agriculture zone "...to ensure the continuation of broad-acre agriculture as the principal land use in the district, encouraging where appropriate the retention and expansion of agricultural activities". Landfill enterprises are not an agricultural activity, should not be placed in our broad-acre farms, but instead Landfills destroy and poison our environment.
